AUTOMATION FROM

PACKAGE TO TRUCK

“Local support - international expertise”

# PRODUCTION LINE AUTOMATION FROM PACKAGE TO TRUCK

## 1 Product into Packet

- Tray formers and tri sealers

- End and top load cartoners

## 2 Secondary Packaging

- Wraparound and RSC case packers
- Shelf ready packaging
- Case erectors and sealers

### Opportunity

### Work Shop

### Design Solution

### Implementation

HMPS use a proven methodology to ensure every installation will meet your expectations. By engaging you, the customer in the specification stage, right through to design and implementation. Your solution will exactly meet your specifications in terms of agreed performance, budget and time frames.

## 3 Robotic Picking and Packaging

### Robotic Picking

High speed robots loading flow wrappers, and cartoning machines.

### Robotic Case Packing

Robot case packers provide long term flexible case packing solutions.

## 4 Palletising

- Compact palletising cells
- High speed robotic palletising systems
- Pallet dispensers

## 5 Warehousing & Distribution

- Laser guided vehicles for all pallet movements
- Warehousing and pallet tracking systems
- Laser guided vehicles with integrated vision systems for truck loading
